MCAS Checkpoint Outreach

Broad and targeted stakeholder engagement on the MCAS is an ongoing and evolving effort. Through continued community engagement, outreach, and transparent reporting, the Port is ensuring that residents, stakeholders, and partners remain informed about MCAS progress!

- **6,500** social media impressions
- **3,750** community members and media received press releases
- **70%** say cleaner air and better health is the most important MCAS initiative
- **76%** say Port's progress on air quality is good or excellent

Shore Power at National City Marine Terminal (NCMT)

The Port and Pasha Automotive Services (NCMT operator) deployed shore power infrastructure and successfully commissioned a rollon/roll-off (Ro-Ro) vessel in October 2025.

Pasha invested $2.4 million to retrofit two of its vessels, providing them with the ability to power the vessels through grid electricity rather than diesel fuel while at berth, which reduces air emissions.

Portside Community Academy

The Portside Community Academy (PCA) is an educational program aimed at building deeper connections between the Port and residents of Portside Community.

Since its launch in 2023, over 250 participants have graduated (10 cohorts so far) from the Academy's structured educational program.
